

In addition, there are 2 sheets of fire assays that were taken where the locations were lost with a GPS unit. There were 18 total, and out of these, 1 ran .007 Au, 2 ran .006, 2 ran .005, 3 ran .004, and 5 ran .003. They were all believed to be from silicified granite or arkose in the 2 red circled areas shown.
